Author Index Volume 60 (1991)

Ageev, Ye.P., 1
Anderson, J.L., 123

Bhattacharyya, D., 75
Bo, D., 63
Böddeker, K.W., 119
Bodzek, M., 25
Bohdziewicz, J., 25
Bokarev, A.K., 13

Charcosset, C., 87
Chmielewski, A.G., 319

Dao, L.H., 41
Ding, L.H., 87

Falconer, J.L., 185
Fane, A.G., 119
Freeman, B.D., 147

Goswami, A.N., 261

Hachisuka, H., 103
Handlířová, M., 157
Hook, W.A. van, 319
Hopfenberg, H.B., 147
Hughes, J.A., 75
Hwang, S.-T., 207

Imai, T., 103

Jaffrin, M.Y., 87
Järvinen, P., 275
Jay, M., 75
Jung, D.S., 233

Kaliuzhnyi, N.E., 13
Kang, Y.S., 219
Khotimskii, V.S., 13
Kim, H.J., 219
Kim, S.C., 233
Kim, T.H., 233
Kim, U.Y., 219
Kinoshita, T., 103
Ko, M.K., 195
Koros, W.K., 119
Kun, Z., 63

Lee, D.S., 233
Lee, K.-I., 207
Litvinova, E.G., 13
Lonsdale, H.K., v

Macenauer, J., 157
Machač, I., 157
Mason, E.A., 125
Miljevic, N.R., 329
Miranda, N.R., 147

Nakamichi, H., 307
Noble, R.D., 185, 297
Nyström, M., 275

Pedersen, H., 41
Pellegrino, J.J., 195
Peskin, A.P., 195
Platé, N.A., 13

Rawat, B.S., 261
Reichelt, G., 253

Sharma, A., 261
Shim, I.-W., 207
Smirnov, V.S., 1
Sperry, D.P., 185

Takizawa, A., 103
Tanaka, H., 307
Tomicki, B., 169
Tsujita, Y., 103

Van Hook, W.A., 319
Vershoubskii, A.V., 1
Vieth, W.R., 41
Volkov, V.V., 13

Yampol'skii, Yu.P., 13
Yazawa, T., 307
Yokoyama, T., 307

Zakrzewska-Trznadel, G., 319
Zhou, S., 75

Subject Index Volume 60 (1991)

acoustic sensor, 253
alkaline phosphatase, 75
alumina membrane, 185
amber, 147

bacterial retention, 253
bovine serum albumine, 275
bubble point, 253

carbon dioxide transport, 41
cation-exchange membranes, 157
cellulose acetate membranes, modification of, 207
cellulose acetate membranes, 87
ceramic membranes, 185
composite membranes, 307

dialysis, 157
diffusion, 125, 147, 185, 297
diffusion coefficient, 219
diffusional flow, 253
drop size prediction, 261
dual mode sorption model, 13
dual-sorption model, 103

facilitated transport, 297
fixed site carrier membranes, 297
fouling, 275

gas and vapor permeation, 13, 103, 147, 185, 297
gas separation, 185, 207, 233, 297
glass membranes, 103
glassy polymer, 41

history, 125
hollow fiber modules, 87
hydrophilicity, increase of, 275

immersion precipitation method, 219
inorganic membranes, 185
interpenetrating polymer network, 233
inverse gas chromatography, 13
isotope separation, 319

liquid membranes, 261
liquid/vapor permeation, 319
lysozyme, 275

mass-transfer, 195
mechano-chemical potential, 169
membrane preparation and characterization, 63, 233
membrane preparation and structure, 25, 103, 219, 307
membrane structure, 41
membrane transport, 125
metal sulfate dialysis, 157
micropores, 1
microporous membranes, 253
microporous and porous membranes, 25, 103
microvoids, 103

organic separations, 63
oscillatory model, 1
osmosis, 125

partition coefficient, 169
permselectivity, 207
pervaporation, 1
phase inversion, 219
phenomenological equation, 169
phosphatase, 75
plasma fractionation, 87
poly(ethylene terephthalate) membrane, 41
poly(trimethylsilylpropyne) membrane, 13
poly(vinyltrimethylsilane)membrane, 1, 13
polycarbonate membranes, 25
polyimide membranes, 63
polysulfone membranes, 75, 275
polytetrafluoroethylene membrane, 319
polyurethane-polystyrene membrane, 233
pore diameter, 253
porous glass membrane, 307

radiophamaceuticals, 75
reverse osmosis, 307

separation of hydrogen/methanol, 185
separation of oxygen/nitrogen, 233
separation of immunoglobulins/albumin, 87
sol-gel method, 307
solubility and partitioning, 147

theory, 41, 157, 195, 297
thermodynamics, 169
thymidine, 75

ultrafiltration, 25, 63, 195, 275
UV irradiation, 275

water and alkali durability, 307
whey, 275

zirconium oxide, 307
